

Logic Homework Exercises #2 (Conditional/Biconditional Statements)

FALL 2005

Pat Rossi

Name _____

Instructions. In exercises 1-7 let p be the statement “It is raining.” and let q be the statement: “I will play golf.” Write each statement in symbolic form.

1. I will play golf only if it is raining.
2. If it is raining, then I will play golf.
3. It will be raining if I play golf.
4. Rain will be a necessary and sufficient condition for me not to play golf.
5. Rain will be a sufficient condition for me not to play golf.
6. It will not rain if and only if I play golf.
7. My playing golf will be a necessary and sufficient condition for it to rain.

In exercises 8-11 construct a truth table for the statement given.

8. $(p \longleftrightarrow q) \vee r$
9. $p \longleftrightarrow (q \vee r)$
10. $(\sim p \rightarrow q) \wedge r$
11. $\sim p \rightarrow (q \wedge \sim r)$
